Programme Specification (UG)

Awarding body / institution: Queen Mary University of London
Teaching institution: Queen Mary University of London
Name of final award and programme title: BSc Economics and International Finance
Name of interim award(s): N/A
Duration of study / period of registration: 3 or 4 years
QMUL programme code / UCAS code(s): UBCF-QMECON1/L13N, UBCF-QMECOF1/L1NY
QAA Benchmark Group: Economics
FHEQ Level of Award: Level 6
Programme accredited by: Chartered Financial Analyst UK
Date Programme Specification approved: 
Responsible School / Institute: School of Economics and Finance

Schools / Institutes which will also be involved in teaching part of the programme: N/A
Collaborative institution(s) / organisation(s) involved in delivering the programme: N/A

Programme outline
The aims of this degree are to provide the students a thorough training in the economics of finance; the source of finance; international trade and development; the evaluation of global financial markets and corporations; the management and measurement of financial risk in a domestic and, more specifically, an international environment. This will be done at both a quantitative and analytical level.
The programme contains a basic core of general economics, mathematics, and statistics. This leads on to more specialised modules in economics, econometrics, international trade, and especially in finance. It provides hands-on experience of using statistical packages and presentation of reports. Graduates of this programme obtain jobs requiring economic and statistical reasoning in diverse areas such as finance, international organisations, business and government. They may also be suited to further training in economics, finance, development, and econometrics.

Aims of the programme
To provide a challenging and friendly learning environment in which research of international standing informs and supports effective teaching;
To provide the students the basic tools in making the optimal finance and economic decisions in an environment of economic
uncertainty;
To enhance their quantitative skills in the analysis and trading of financial markets;
To learn how financial institutions or corporations work;
To evaluate alternative investment strategies of corporations;
To understand how the global environment affects the decision making of managers in corporations;
To learn how the interactions of different national economies shape the worldwide pattern of economic activity;
To encourage students to develop the motivation and capacity to manage their own learning, and acquire a range of transferable skills valuable to them in employment or in continued education.

What will you be expected to achieve?

The degree will provide you with a thorough training in theoretical and applied economics and finance. You will be confronted with the latest developments in these fields and will develop an ability to provide critical and analytical interpretation of past and current economic and financial events. You will be able to engage in policy analysis and you will be able to support it through a competent, informative and critical use of economic and financial data using statistics and quantitative tools. Your ability to engage in economic, financial and policy analysis will be supported by the development of communication, team-building, reflective and project management skills.

Please note that the following information is only applicable to students who commenced their Level 4 studies in 2017/18, or 2018/19

In each year of undergraduate study, students are required to study modules to the value of at least 10 credits, which align to one or more of the following themes:

- networking
- multi- and inter-disciplinarity
- international perspectives
- enterprising perspectives.

These modules will be identified through the Module Directory, and / or by your School or Institute as your studies progress.

Academic Content:

| A1 | Demonstrate knowledge and understanding of a core of economic principles and analysis to an appropriate level |
| A2 | Show some knowledge and understanding of the application of statistical methods to economic data, using econometric software where appropriate |
| A3 | Apply economic reasoning to a range of policy issues |
| A4 | Show knowledge and understanding of a number of specialised areas in economics and international finance. |

Disciplinary Skills - able to:
Programme Title: BSc Economics and International Finance

**B1** Solve problems, through conceptualisation and analysis

**B2** Collaborate, through working co-operatively

**B3** Communicate, through oral and written presentations;

**B4** Use IT skills (internet to retrieve information; email to share information; word processing and spreadsheets to store, analyse and present information);

**B5** Manage time and work cooperatively within a community;

**B6** Achieve objectives by the relevant deadlines.

**Attributes:**

**C1** acquire and apply knowledge in a rigorous way;

**C2** connect information and ideas within their field of study;

**C3** use writing for learning and reflection;

**C4** adapt their understanding to new and unfamiliar settings;

**C5** acquire new learning in a range of ways, both individually and collaboratively;

**C6** use quantitative data confidently and competently;

**C7** acquire transferable key skills to help with career goals and continuing education;

**C8** develop effective spoken and written English;

**C9** acquire substantial bodies of new knowledge;

**C10** use information for evidence-based decision-making and creative thinking.

**How will you learn?**

The learning outcomes for the programme are delivered by a range of modules across the programme. Teaching and learning is mainly via lectures and classes. Teaching and learning strategies vary from module to module.

Students on economics programmes take a similar core in years one and two, enabling them to specialise in year three and adapt to different programmes as their interests change. Core subject specific skills are introduced and developed via ECN113 Principles of Economics and then via ECN106 Macroeconomics 1 and ECN206 Macroeconomics 2 (for the macroeconomics strand); and ECN111 Microeconomics 1, ECN214 Games and Strategies and ECN211 Microeconomics 2 (for the microeconomics strand). Mathematical competence is developed via the Mathematical Methods in Economics and Finance module, while statistical competence is developed via ECN121 Statistical Methods in Economics, and ECN224 Econometrics 1.

The programme’s international scope is introduced in Year 1 through ECN102 World Economy, and developed in Year 2 with ECN209 International Finance and ECN228 International Trade. Year 3 includes ECN377 International Financial Strategy, ECN376 Finance of Emerging Markets and ECN370 Development Economics.
Programme Title: BSc Economics and International Finance

An intensive training in finance is achieved thanks to a rich stream of modules which include Principles of Finance, ECN226 Capital Markets I, ECN378 Corporate Finance, and ECN377 International Financial Strategy.

Other modules in the programme also develop and assess core skills through lectures and classes.

How will you be assessed?

Assessment is by a variety of methods including formal examinations, in-class tests, coursework of various forms, presentations, independent dissertation. Most modules will have two methods of assessment. Please refer to the academic regulations for assessment regulations: http://www.arcs.qmul.ac.uk/policy_zone/index.html

How is the programme structured?

Please specify the structure of the programme diets for all variants of the programme (e.g. full-time, part-time - if applicable). The description should be sufficiently detailed to fully define the structure of the diet.

In Year 1, students must take the nine modules specified in the designated pathway (this includes one compulsory non-credit bearing level 3 module).

In Year 2, students must take the seven modules specified in the designated pathway and one 15 credit elective module which is at level 5 and taught in SEF.

In Year 3, students on the "with year abroad" route will spend the year studying at an institution overseas.

In the final year, students must take the two compulsory modules and at least one of the two specified elective modules in the designated pathway below. In the final year students must take at least 105 credits at level 6. 15 credits can be at level 5 or 6. At least 90 credits at level 6 must be from SEF. The remaining 30 credits can be chosen from anywhere in the University.

What are the entry requirements?

AAA at A-level including grade A or above in Mathematics.

How will the quality of the programme be managed and enhanced? How do we listen to and act on your feedback?

Input from external examiners, students and regular internal discussion are the main channels through which the programme's quality will be managed and enhanced.

The Teaching and Curriculum Development (TCD) committee deals with all matters relating to the delivery of taught programmes at School level including monitoring the application of relevant QM policies and reviewing all proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in
Programme Title: BSc Economics and International Finance

this Committee’s work in a number of ways, such as through the SSLC, or consideration of module evaluation questionnaires.

All Schools operate an Annual Programme Review of their taught undergraduate and postgraduate provision. The process is normally organised at a School-level basis with the Head of School, or equivalent, responsible for updating the School's Taught Programmes Action Plan. Students’ views are considered in this process through analysis of the National Student Survey (NSS) and module evaluations.

There are four subject based Teaching Review Groups (TRGs) (covering microeconomics, macroeconomics, quantitative and finance), membership of which includes all those who teach within that area, and these carry primary responsibility for monitoring modules, reviewing their effectiveness, and considering new developments. The TCD as a whole has responsibility for reviewing the overall structure of the UG degree programmes, ensuring their coherence and considering more general developments. It also considers any wider implications of subject specific recommendations of the TRGs. TRGs will keep learning outcomes under review, and develop the methods of assessment of these outcomes.

External examiners have the opportunity to comment both on individual module content and assessment and on the broader provision. They are asked to monitor fairness and consistency in assessment procedures and to scrutinise the effectiveness and appropriateness of the assessment.

The School welcomes feedback from students. This is usually collected through the Staff-Student Liaison Committee (SSLC), module evaluations, the National Student Survey (NSS) and UK Engagement Survey (UKES), and formal and informal discussions with the teaching team throughout the academic year.

The Staff-Student Liaison Committee (SSLC) provides a formal means of communication and discussion between a School and its students. The committee consists of student representatives from each year in the School together with appropriate representation from staff within the School. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. Staff-Student Liaison Committees meet regularly throughout the year.

The School runs both a mid-term and end-of-term evaluation for each module. This allows both module convenors and the School to collect important information and feedback from students, and to make any relevant adjustments promptly if necessary. The evaluations are also discussed in the TCD committee and used to award the annual School prizes for best lecturer and class teachers.

What academic support is available?

Each student is allocated a personal academic adviser, who approves option choices and provides support with any problems. Personal tuition is provided primarily through tutorial classes and visits to module organisers during their office hours, which are advertised on office doors and on the web. Programme induction for new students begins during the enrolment period and extends into the first semester; it includes a series of presentations organised by the Senior Tutor. The School organises the Peer Assisted Study Support (PASS) scheme and weekly mathematics and statistics support classes.

Programme-specific rules and facts

In order to obtain an "Economics and International Finance" degree, a student may fail at most one core module. Students who fail more than one core module will get an “Economic Studies” degree provided the other requirements for such degree are satisfied.

A student who does not meet the requirements for a BSc (Econ) degree, but who meets the requirements for an exit award will be awarded an “Economics and International Finance” exit award, providing they have failed no more than one core module. Students who fail more than one core module will get an “Economic Studies” exit award.

For the "with year abroad" route: If a student does not complete, or fails to pass, the study abroad year, then the student will automatically transfer onto the Economics and International Finance degree, albeit with the Study Abroad Year showing on their transcript.
### Specific support for disabled students

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:
- Finding out if you have a specific learning difficulty like dyslexia
- Applying for funding through the Disabled Students’ Allowance (DSA)
- Arranging DSA assessments of need
- Special arrangements in examinations
- Accessing loaned equipment (e.g. digital recorders)
- Specialist one-to-one "study skills" tuition
- Ensuring access to course materials in alternative formats (e.g. Braille)
- Providing educational support workers (e.g. note-takers, readers, library assistants)
- Mentoring support for students with mental health issues and conditions on the autistic spectrum.

### Links with employers, placement opportunities and transferable skills

Connections to the real world examples and case studies are regularly embedded within all modules and allow students to develop analytical and critical skills highly regarded by employers. The academic programme is complemented by an extracurricular set of career workshops aimed at maximising the students’ opportunities to secure, progressively, places on insight weeks (year 1), internships (year 2) and eventually long term employment at the end of their studies. Social networking sites such as LinkedIn support the School’s employability strategy as well as the support provided by an extended alumni network.

Graduates of the programme have an excellent record in gaining employment. First destination statistics typically suggest around 65% going directly into employment within six months of graduation and another 25% going into postgraduate study. Curriculum development is informed by research active staff, some of whom also work for major employers of economics graduates (such as the Bank of England and the Treasury).
