# Programme Specification

**Awarding Body/Institution**  
Queen Mary University of London

**Teaching Institution**  
Queen Mary University of London

**Name of Final Award and Programme Title**  
MRES in Global Health Law and Governance

**Name of Interim Award(s)**  

**Duration of Study / Period of Registration**  
1 year full time

**QM Programme Code / UCAS Code(s)**  

**QAA Benchmark Group**  

**FHEQ Level of Award**  
Level 7

**Programme Accredited by**  

**Date Programme Specification Approved**  
07 Feb 2018

**Responsible School / Institute**  
Blizard Institute

## Schools which will also be involved in teaching part of the programme

- School of Politics and International Relations
- School of Business & Management

## Institution(s) other than Queen Mary that will provide some teaching for the programme

## Programme Outline

The MRES in Global Health Law and Governance is a pre-doctoral training programme designed to provide a critical, research led approach to the study of global health and other fields of practice, together with training in the key research skills appropriate for Doctoral level study. Alongside a suite of substantive modules offered in conjunction with the School’s Global Public Health and Policy, the programme includes core modules in research design, qualitative and quantitative methods taken jointly with social science students from a range of disciplines across QMUL, Kings College London and Imperial College as part of the training offered by the ESRC funded London Interdisciplinary Social Science Doctoral Training Partnership.

The MRES in Global Health Law and Governance is an approved pathway for ESRC funding, enabling students to apply for ESRC 1+3 funding to cover both the MRes and a PhD, and successful MRes graduates to apply subsequently for ESRC +3 PhD funding. The MRes also caters more generally for those seeking to develop their ability to apply knowledge and understanding of health care governance in a complex global environment –and is an ideal preparation for a career in professional clinical work, as well as for those pursuing advanced studies.
Programme Title: MRES in Global Health Law and Governance

Aims of the Programme

Funding for the ESRC funded London Social Science Doctoral Training Centre is coming to an end in 2017, taking its last cohort of students in September 2016. To safeguard access to ESRC funded Studentships, QMUL has joined with KCL and Imperial in a bid for a new Doctoral Training Partnership which, if the bid is successful, will take its first cohort of students in September 2017.

The new DTP has provided an opportunity to significantly extend the Schools, and ‘training pathways’, eligible for ESRC funding at QMUL, including new opportunities for the School of Medicine and Dentistry. ESRC Studentships are available on a +3 (PhD) and 1+3 (Level 7 qualification plus PhD) basis. To be eligible for 1+3 funding a student must complete an MA or MRes which includes modules meeting the ESRC’s training guidelines on the epistemologies of social science, research design, and qualitative and quantitative methods. In-line with the strategy pursued with the previous DTC, QMUL has determined that the most effective way of meeting the ESRC’s training guidelines is via a number of new MRes degrees, each of which will provide the subject specific substantive knowledge associated with the discipline or field, together with the generic training in social science research required by the ESRC. The MRes degrees will run in parallel with existing MA or MSc programmes in their field, with a number of shared substantive modules.

For reasons of efficiency, these training elements will be provided via two new 30 credit modules: Introduction to Social Science 1 - epistemology, research design, and qualitative methods, and Introduction to Social Science 2 - quantitative methods and data - that together will form the core training element of each associated MRes degree. Further, for added efficiency, these core modules will be provided by the QMUL School of Politics and International Relations, with these modules open to all DTP funded students at QMUL together with DTP funded students at our partner institutions (KCL and Imperial).

Students will have the skills and knowledge to work in health and governance at local, national, and international level, and in governmental and international bodies and NGOs. Other students from this programme will have the research skills to work in research-related posts.

Research methods are integrated into core modules, with an account of selected methodological issues and challenges. Students will gather and synthesise information about particular method relevant to modules and topics within modules.

Aims:

- Access, understand and apply research evidence;
- Develop, evaluate, and maintain effective and appropriate health services for populations;
- Teach and support others by developing training courses and academic programmes; and
- Identify and meet their lifelong learning needs.

The MRES in Global Health Law and Governance will run in parallel with the School of Medicine and Dentistry’s existing MSc Global Health Law and Governance providing the possibility of 1+3 funding for students seeking to pursue a PhD in this area.

What Will You Be Expected to Achieve?

By the end of the programme students are expected to:

- Analyse and critique existing public health policies, laws, and governance
- Understand legal and regulatory processes at the national and international level as they relate to health and health policy
- Understand and critically analyse precisely and effectively in the context of public health policy, law and regulation
- Knowledge and understanding of the institutions of global public health standard setting, such as World Bank, the World Health Organization, the International Monetary Fund, and other international organisations involved in health policy
- Have developed knowledge and understanding quantitative methods and data in social science

Academic Content:

| A1 | Develop knowledge and understanding of epistemology, research design, and qualitative methods in social science |
| A2 | Develop knowledge and understanding quantitative methods and data in social science |
### Programme Title: MRES in Global Health Law and Governance

| A3 | knowledge and understanding of the institutions of global public health standard setting, such as World Bank, the World Health Organization, the International Monetary Fund, and other international organisations involved in health policy |
| A4 | Knowledge and understanding of the principles and policy norms of public health and health systems, including administration, financing, organisation, and delivery |

### Disciplinary Skills - able to:

| B1 | Evaluate and critique current public health policy and propose alternative approaches |
| B2 | Assess the changing context of public health policy formation |
| B3 | Understand legal and regulatory processes at the national and international level as they relate to health and health policy |
| B4 | Demonstrate knowledge of methodological approaches appropriate to social science subjects |
| B5 | Understand and critically analyse precisely and effectively in the context of public health policy, law and regulation |
| B6 | Analyse and critique existing public health policies, laws, and governance |

### Attributes:

| C1 | Ability to understand and critically analyse precisely and effectively in the context of public health policy |
| C2 | Ability to participate confidently in academic and professional debate |
| C3 | Ability to work and study to a high standard and to defined outcomes both independently and as part of a team |
| C4 | Ability to deal with complex issues both systematically and creatively |
| C5 | Ability to undertake advanced scholarly work and policy research |

### How Will You Learn?

Each topic will be taught using a range of methods, varying according to the subject and learning objectives of the module. All modules will include lectures, small group tutorials, and independent study. Most modules will follow a format of structured preparatory work (reading and reflection exercises), a weekly interactive lecture, a two-hour small group seminar, and topic discussions by email. Visiting speakers will describe research, clinical or service development work in different countries and settings. Some modules will focus on key ‘grey literature’ reports such as those produced by the World Health Organization. Data analysis sessions will include introduction to real datasets such as those from local or national public health observatories.
How Will You Be Assessed?

Different modules will be assessed differently, depending on the learning objectives. Assessment methods will include a traditional examination (with essays or short answer questions), tutor-marked assignments (typically, a 3,000-word structured essay), presentations, and a 10,000-12,000-word dissertation.

How is the Programme Structured?

Please specify the full time and part time programme diets (if appropriate).

Students taking the MRES in Global Health Law and Governance will sit modules totalling 120 credits, and complete a dissertation (60 credits).

Two compulsory 30 credit modules will be delivered by the School of Politics and International Relations:
- Introduction to Social Science Research 1: epistemology, research design, and qualitative methods (30 credits) NEW
- Introduction to Social Science Research 2: quantitative methods and data (30 credits) NEW

Three compulsory 15 credit modules will be offered by the Blizard Institute:
- Health Systems Policy and Practice (semester 1)
- Health Inequalities and Social Determinants of Health (semester 1)
- Global Health, Governance and Law (semester 2)

One compulsory 60 credit dissertation module will be delivered by the Global Health Unit in the Blizard Institute:
- Dissertation ICM7119

One 15 credit module will be offered by the Global Health Unit in the Blizard Institute/School of Business Management in Semester 2, with students choosing from the following list:

- Governance of Migration, Displacement and Healthcare
- Health Systems Theory, Policy and Political Economy
- Gender, Sexuality and Health
- Ecological Global Health
- Anthropology of Global Health
- Primary Care and Global Public Health
- Globalisation and Contemporary Medical Ethics
- Economics of developing countries
- Human resource management in the public services
- Human Rights and Public Health
- Understanding and managing human resources for global health
- Researhing Global Health and Biomedicine – Geneva Field Class
- Primary Care Capacity Building: Leadership and Learning

**What Are the Entry Requirements?**

At least an upper second class undergraduate degree and/or equivalent professional experience. IELTS 7.0 is required for non-native speakers of English.
How Do We Listen and Act on Your Feedback?

The Staff-Student Liaison Committee provides a formal means of communication and discussion between schools/institutes and its students. The committee consists of student representatives from each year in the school/institute together with appropriate representation from staff within the school/institute. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. Staff-Student Liaison Committees meet regularly throughout the year.

Each school/institute operates a Learning and Teaching Committee, or equivalent, which advises the School/Institute Director of Taught Programmes on all matters relating to the delivery of taught programmes at school level including monitoring the application of relevant QM policies and reviewing all proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee’s work in a number of ways, such as through student membership, or consideration of student surveys.

All schools/institutes operate an Annual Programme Review of their taught undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery; the main document of reference for this process is the Taught Programmes Action Plan (TPAP) which is the summary of the school/institute’s work throughout the year to monitor academic standards and to improve the student experience. Students’ views are considered in this process through analysis of the NSS and module evaluations.

Academic Support

Students receive academic support via meetings with their academic advisor and via the programme director, module lecturers and attendance at research-related events in both Schools.

Programme-specific Rules and Facts

NA

Specific Support for Disabled Students

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:
- Finding out if you have a specific learning difficulty like dyslexia
- Applying for funding through the Disabled Students’ Allowance (DSA)
- Arranging DSA assessments of need
Programme Title: MRES in Global Health Law and Governance

• Special arrangements in examinations
• Accessing loaned equipment (e.g. digital recorders)
• Specialist one-to-one study skills tuition
• Ensuring access to course materials in alternative formats (e.g. Braille)
• Providing educational support workers (e.g. note-takers, readers, library assistants)
• Access to specialist mentoring support for students with mental health issues and Autistic Spectrum Disorders.
