Programme Title: Dental Science for Clinical Practice

Programme Specification (PG)

Awarding body / institution: Queen Mary University of London
Teaching institution: Queen Mary University of London
Name of final award and programme title: MSc in Dental Science for Clinical Practice
Name of interim award(s): PG Cert/PG Dip
Duration of study / period of registration: 1 calendar year, FT
Queen Mary programme code(s): PMSF-QMDENT1 PSDSCP PFQM-A4UC-09
QAA Benchmark Group: Dentistry
FHEQ Level of Award: Level 7
Programme accredited by: N/A
Date Programme Specification approved: 27 Nov 2020
Responsible School / Institute: Institute of Dentistry

Programme outline

This full time, one-year MSc programme is open to dentists from countries outside of the United Kingdom who seek to improve their clinical and professional skills. The curriculum is designed to teach the knowledge and skills practiced in the United Kingdom. As a student on our programme you will acquire a deeper knowledge and understanding of basic and applied sciences and advance your clinical skills via a series of practical, laboratory based classes in a simulated dental setting. You will also be provided with the hands on experience of undertaking dental procedures using typodont teeth set in a manikin head where you will build on your existing knowledge and skills through supervised clinical practice on dental manikins, treatment planning and completion of set clinical procedures. Successful completion of the didactic, clinical and research elements of the MSc programme can prepare students for examinations leading to registration as a dentist in the UK.

Aims of the programme

This programme aims to extend the previous professional experience of overseas dentists by developing their knowledge of and skills and approach in the field of dentistry. This MSc programme emphasizes and promotes:

1. Basic sciences and their application to the dental clinical environment;
## Programme Specification PG / 2019-20 / V3

**Programme Title:** Dental Science for Clinical Practice

2. Enhancement of clinical skills;
3. A critical approach to evaluating relevant literature so as to be able to establish evidence-based practice in dentistry
4. A deeper understanding and relationship of audit to clinical governance and clinical effectiveness
5. The structure and features of health provision in the UK with particular regard to dentistry; and
6. Effective methods of health promotion and oral health promotion

### What will you be expected to achieve?

Students that successfully complete the programme will be able to:

1. Assess and manage oral and craniofacial hard and soft tissue diseases including referral as and when appropriate
2. Undertake the comprehensive clinical management of dental patients of any age including diagnosis, treatment planning, surgical and non-surgical management and prevention of dental diseases
3. Manage medical and dental emergencies in line with guidance from the UK Resuscitation Council
4. Manage pain and anxiety in patients requiring dental treatment
5. Identify key transferable skills to aid them with their career goals and continuing professional development

### Academic Content:

<table>
<thead>
<tr>
<th>A1</th>
<th>The application of basic medical and dental sciences to the clinical environment.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A2</td>
<td>The principles of clinical dentistry.</td>
</tr>
<tr>
<td>A3</td>
<td>The structure and features of health provision in the UK with particular regard to dentistry.</td>
</tr>
<tr>
<td>A4</td>
<td>Effective methods of health promotion and oral health promotion.</td>
</tr>
</tbody>
</table>

### Disciplinary Skills - able to:

<table>
<thead>
<tr>
<th>B1</th>
<th>Understand the role of professional and self-regulation.</th>
</tr>
</thead>
<tbody>
<tr>
<td>B2</td>
<td>Critically explore and evaluate scientific and clinical research in order to appraise the evidence base for current clinical practice.</td>
</tr>
<tr>
<td>B3</td>
<td>Describe statistical methods, the principles of research governance and ethics and research methodology.</td>
</tr>
<tr>
<td>B4</td>
<td>Develop management techniques and practices to ensure high standards of dental practice and optimum performance of team members.</td>
</tr>
</tbody>
</table>

### Attributes:

<table>
<thead>
<tr>
<th>C1</th>
<th>Extract and analyse information to identify problems and solutions and generate discussion on a broad range of issues.</th>
</tr>
</thead>
<tbody>
<tr>
<td>C2</td>
<td>Better appreciate the limits of skill sets and the point at which additional support is required.</td>
</tr>
<tr>
<td>C3</td>
<td>Exercise sound clinical judgement around the selection and execution of appropriate operative techniques for all stages of planned treatment in conjunction, as necessary, with other specialists and technicians.</td>
</tr>
</tbody>
</table>
Programme Title: Dental Science for Clinical Practice

<table>
<thead>
<tr>
<th>C4</th>
<th>Communicate with patients, the public, members of the team and other professionals to ensure a holistic approach to the delivery of care.</th>
</tr>
</thead>
<tbody>
<tr>
<td>C5</td>
<td>Using laboratory skills assess and manage oral and craniofacial hard and soft tissue diseases to include referral as appropriate.</td>
</tr>
<tr>
<td>C6</td>
<td>Using laboratory skills undertake the comprehensive clinical management of dental patients of any age including diagnosis, treatment planning surgical and non-surgical management and prevention of dental diseases.</td>
</tr>
<tr>
<td>C7</td>
<td>Develop the ability to detect abnormalities in general, craniofacial or dento-alveolar development using laboratory skills.</td>
</tr>
<tr>
<td>C8</td>
<td>Manage medical and dental emergencies in line with guidance from the UK Resuscitation Council.</td>
</tr>
</tbody>
</table>

How will you learn?

A variety of teaching and learning methods will be employed including:

- Lectures, seminars and workshops
- Clinical skills sessions in a laboratory using a dental manikin
- Clinical sessions observing patient treatments/management
- Self-Study
- Tutorials with those students needing additional guidance
- Clinical Case presentations
- Audit project presentation
- Group work
- Journal club
- Reflective practice and integration of learning
- E-Learning.

In order to achieve the programme learning outcomes students are expected to independently study and weekly self-directed study sessions are timetabled to allow students to prepare for scheduled sessions, follow-up work, wider reading, research and revision.

Students attend a study skills session at the start of the MSc course to prepare them for Postgraduate study in the UK and academic writing sessions to support writing of their dissertation.

How will you be assessed?

Assessment strategies:

- Formative assessment - regular informal verbal feedback to individual students regarding their performance and achievement of the learning objectives.
- Summative assessment of each module: continual assessment, written papers, OSCE, clinical case presentation, literature review report and audit report and presentation.
- Competency-based Practical test on a typodont.

Assessment strategies support student learning and timely feedback is provided to students on assessed work by teachers.

How is the programme structured?

Please specify the structure of the programme diets for all variants of the programme (e.g. full-time, part-time - if applicable). The description should be sufficiently detailed to fully define the structure of the diet.

The Masters course will be run over one year (Full time) and will comprise of six Level 7 credit modules.
Programme Title: Dental Science for Clinical Practice

The research component will be fulfilled by a structured literature review and clinical audit report.

The Fundamentals of Research Methods module is a module which is taught jointly with other taught postgraduate programmes in the Institute of Dentistry.

The remaining five modules are unique to the MSc in Dental Science for Clinical Practice and are listed below.

Students are required to read and critically review essential research papers and additional papers of relevance, as suggested by teachers.

What are the entry requirements?

• Upper Second Class (2.1) BDS degree or equivalent
• Minimum of 1 year relevant post-qualification experience
• For students whose first language is not English an IELTS overall score of 7.0 with a writing score of 6.5.

If you are offered a place on this course you will be required to undertake a DBS and an occupational health check.

How will the quality of the programme be managed and enhanced? How do we listen to and act on your feedback?

The Staff-Student Liaison Committee provides a formal means of communication and discussion between schools/institutes and its students. The committee consists of student representatives from each year in the school/institute together with appropriate representation from staff within the school/institute. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. Staff-Student Liaison Committees meet regularly throughout the year. All lectures will have feedback documentation.

Each school/institute operates a Learning and Teaching Committee, or equivalent, which advises the School/Institute Director of
Programme Title: Dental Science for Clinical Practice

Taught Programmes on all matters relating to the delivery of taught programmes at school level including monitoring the application of relevant QM policies and reviewing all proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee's work in a number of ways, such as through student membership, or consideration of student surveys.

All schools/institutes operate an Annual Programme Review (APR) of their taught undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery who work throughout the year to monitor academic standards and to improve the student experience. Students’ views are considered in this process through analysis of the Postgraduate Taught Experience Survey (PTES) and module evaluations.

What academic support is available?

Students attend a course Induction at the start of the MSc.

Each student is assigned a primary and secondary supervisor for their literature review and clinical audit.

Students are taught and supervised by Consultants when they attend a Consultant Clinic.

The Institute of Dentistry’s strategy for postgraduate student support and guidance is based on the principle of providing support through the Programme Lead. The Programme Lead will help you with academic and pastoral support. The small size of your postgraduate student group means that students can meet and talk informally with their Programme Lead easily.

Students will make formal appointments to meet their Programme Lead during the year, to receive termly feedback on their progress, but informal meetings at other times are also welcomed. The Programme Lead is there to provide positive pastoral and academic support.

Programme-specific rules and facts

How inclusive is the programme for all students, including those with disabilities?

The Institute of Dentistry will provide the following:

For specific learning disabilities:
- Specialist One to One Study Skills Support
- regular support from a specialist one to one dyslexia tutor
- lecture notes provided prior to the lecture either through QMPlus or via email
- Q-Review for lectures and/or permitting the student to record for lectures outside where Q-Review takes place eg lab sessions on Phantom Heads
- Specialist software with text-to-speech functionality to aid in concentration/fatigue problems

For physical disabilities:
- Speech recognition software allowing students to dictate without manually typing
- Some information regarding the lab/clinic environment and ensuring it is suitably accessible eg ground floor clinics/lift access to labs on higher floors/ramps etc.
Programme Title: Dental Science for Clinical Practice

The Student Support Office (SSO) has a well developed team who are keen to make sure that you are offered confidential, independent and non-judgemental advice on matters ranging from personal problems and academic issues to university procedures and financial matters such as student funding.

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:

- Finding out if you have a specific learning difficulty like dyslexia
- Applying for funding through the Disabled Students’ Allowance (DSA)
- Arranging DSA assessments of need
- Special arrangements in examinations
- Accessing loaned equipment (e.g. digital recorders)
- Specialist one-to-one study skills tuition
- Ensuring access to course materials in alternative formats (e.g. Braille)
- Providing educational support workers (e.g. note-takers, readers, library assistants)
- Access to specialist mentoring support for students with mental health issues and Autistic Spectrum Disorders.

Links with employers, placement opportunities and transferable skills

This programme will deliver elements of the UK Foundation Curriculum which will enable students to develop their knowledge and skills in preparation for an examination leading to registration in the UK or to progress in their career goals and continuing education in their country of origin.

Programme Specification Approval

| Person completing Programme Specification: | Mrs Lorraine Low, Quality Assurance & Assessments Office |
| Person responsible for management of programme: | Dr Eleni Hagi-Pavli |
